

Matrix Switchers

PM | UX | HX | HTX | MXA | MX

PureLink's comprehensive line of media and data distribution systems – from its flagship PureMedia signal management solutions to first-in-class HDMI 2.0a matrix switchers – integrate a variety of powerful features to reliably distribute Ultra HD video, audio, and control signals from multiple sources to multiple displays/destinations. PureLink matrix switching systems are engineered to provide flexible, customized solutions to meet any design requirement, driving mission-critical A/V from corporate boardrooms to command centers across the globe.

Presentation Systems

Ideal for small conference rooms, classrooms, and collaboration spaces, PureLink's HDTools presentation systems provide all-in-one operation including Ultra HD video and audio switching, scaling, extension and control in a single box. With built-in Don't Blink Seamless Switching Technology and advanced EDID management, PureLink presentation switchers combines powerful features with off the shelf simplicity for easy installation and maintenance.

Extenders

HDMI | DVI | HDBaseT | Fiber Optic

From wall plate and rack mountable extension packages to HDBaseT and fiber optic modular extender pairs, PureLink's signal extension systems deliver superior connectivity for long distance transmission of audio, video, and control signals – whether across the room or to another building.

Switchers & Distribution Amplifiers

HDMI | DVI

HDMI and DVI switchers and distribution amplifiers can reliably manage multiple source and display devices and provide uninterrupted A/V signal transmission over long distances. With advanced functionalities such as Ultra HD/4K support, built-in equalization and re-clocking technology, and Auto-EDID management, PureLink switchers and DAs offer simplified connectivity and operation without programming or a control system.

Format Converters

Format conversion systems can change various analog/VGA and digital signal types into another and minimize routing and distribution complexity. Emulation devices enhance and maintain optimal signal quality, providing a seamless source to display connection.

Cables & Accessories

CX Series | EZ Series | PI Series | PS Series

PureLink **cables** and **accessories** are designed to enhance the functionality of complex A/V systems and provide optimal performance when combined with a wide range of PureLink products. Premium, secure-locking HDMI cables, network and fiber optic cable assemblies, along with convenient installer tools and connectors, all featuring proprietary TOTALWIRE™ Technology, provide the perfect fit to ensure reliable, end-to-end connectivity.

Digital Signage Solutions

PureStream content playback and management solutions offer a fully-integrated network media solution for a variety of digital signage applications including retail, hospitality, and public transportation. PureStream provides a total signage solution with high-performance media playback devices and intuitive software to help manage, create, and deliver dynamic content with maximum efficiency.
